

A.C. Jones Complete Bio

She may be an Ohio native, but AC Jones has Nashville running through her veins. After four years of balancing a musical career and a college education in biochemistry, Jones dove into her country music career full-force. Her debut single, "Buses and Trains", peaked at #33, giving it Top 40 status on the *Music Row* CountryBreakout Chart. Her second single, "Mr. Moon", also gained Top 40 status on the *Music Row* CountryBreakout Chart and reached #57 on the *Billboard* Country Indicator Chart. Jones is currently working on both a live EP and a studio EP, and is planning a third radio release for early 2020. Over the course of her career, she has toured throughout the United States and has even made appearances in Scotland and Canada. Jones has opened for acts such as the Kentucky Headhunters, Marty Stuart, Molly Hatchet, and The Oak Ridge Boys. In the summer of 2014, Jones's infant niece was diagnosed with type one diabetes inspiring her support and advocacy of JDRF. She is also a supporter of the Salvation Army and, as of 2018, has raised over \$17,000 for her hometown Salvation Army chapter through her annual Christmas concert benefit. In her free time, Jones enjoys preparing and testing new recipes for her YouTube feature, *AC Jones Kitchen*. She also enjoys running, kayaking, and cuddling with her beagle/blue heeler mix, Andie.
